

# Variance and Setback Request Checklist by Dixie Power

For Dixie Power to sign off on a Variance or Setback, the following checklist must be completed fully and completely.

Signature page from city/municipality completely filled out with the subdivision lot number or assessors tax number information. Description in writing on the page which lot lines will be affected by the variance.

Drawing showing lot configuration, property line, walls and fences, gates, and any existing utilities. Include on drawing the proposed construction with distances from lot lines and the amount of encroachment that will be made within the Public Utilities Easements.

Property information and Property Owners Signature on all sheets.

Location on all sheets for signature and date from Dixie Power representative.

A copy of this checklist with all of the fields checked or an explanation about why it does not apply to your project.

Thank you,  
Dixie Power  
Engineering Department
